**For Backing Feinstein Bill.**

**May Stop All Mining Material & Equipment Purchases In Apple Valley Until Citizens Have City Council Reverse Resolution Decision. Some Mining District Leaders met in Las Vegas, Nevada over the weekend of April 24, 25 and 26<sup>th</sup> regarding County Supervisors and City Councils that are unaware that they may be falling prey**

to an even larger scheme, that may include President Obama's March 16, 2015 Executive Order which gives the President complete control over ALL the RESOURCES in the United States in times of War or Emergency. This includes control & allocation of energy, minerals, metals, production, transportation, food, and even water resources by decree under the disguise of national defense & national security. The NEW ORDER is not limited to wartime implementation; one of the new functions includes command and control of resources in peacetime determinations. Miners have asked Congressmen to consider a GAO Investigation as to the relationship of Uranium sales to Russia as approved by Hillary Clinton and the State Department and what firms are selling rare earth & precious metals to the United States markets and Defense Logistic Agency (DLA). Who are Congresswoman Judy Chu's potential rare earth & mineral constituents, as she was involved with President Obama in declaring the San Gabriel's a National Monument. The National Monument Declaration locked off Mining from the largest Aluminum, Titanium, and Tungsten deposit in the USA appx. 21 miles long and 7 miles wide, according to engineers and geologists spokesman Donald Fife. This forces the US Markets and DLA to buy rare earths, minerals and metals from foreign sources that may not be friendly to US Foreign Policies.

The Feinstein Bill oversteps the Federal Land Policy and Management Act (FLPMA) as FLPMA did not repeal the 1872 Mining Law, the Multiple Land Use Act (30USC612(b)), the 1872 Mining Law (30USC21a-54) and effectively wiping out mining and the defense logistics agency access to domestic USA minerals and precious metals, (such as the largest yttrium, titanium, tungsten and gold deposits in the United States) that are listed in several geological reports and some Democratically Sealed reports that reveal large rare earth mineral and precious metal deposits. Access to these deposits would stimulate job growth and tax revenues in the western regional United States, specifically California while making the USA independent of foreign

domination of USA markets & war readiness materials. Recreation and renewable energy cannot and will not create these much needed jobs, tax revenues and local economic growth. Apple Valley is completely remiss in their Constitutional view and concept of the 1872 Mining Laws, multiple land use laws, the Federal Land Policy Management Act and the reason they exist. At this point the Apple Valley City Council should be considered part of the uninformed electorate. Further, one has to consider if there is an ulterior motive that might include Feinstein & Apple Valley City Councils involvement in the Apple Valley Yucca Loma Bridge Project, as a motive for the favorable resolution action. In excess of 500 individuals were given the opportunity to review the Boycott proposal, and CDDMC will release their position no later than Wednesday of this week. Mining refers to what happened historically when the USA cut off Japan in World War II from Minerals and precious metals, effectively crippling Japans ability to deliver steel & iron to the Germans for Machine Works & Artillery. *Remember Pearl Harbor.*

The CDDMC poll was unanimous from present mining and recreationalist for a boycott on any town, city or county that backs the Feinstein Bill.

And the cancellation of the Apple Valley Town Council meeting 5/12/15 6:30 PM was not published in advance anywhere of which the Minerals and Mining Advisory Council (MMAC) and California Desert District Mining Coalition (CDDMC) showed up to support companies that where looking to move to Apple valley as their new manufacturing and wholesale center, but where not going to move in and build if Apple Valley were to support the Feinstein Bill.

It is awful suspicious that Apple Valley Town Council new we were showing up to speak the truth and all of a sudden, with no advance public notice, the meeting was cancelled.

**BOYCOTT APPLE VALLEY**
