**TO:**

All Miners, Lease holders of Public and Private Lands, Mining Clubs, Mining Equipment Manufacturers, Mining Companies, Outdoorsmen and Outdoorswoman, Offroaders, Lovers of Freedom etc.

**Subject: "DRECP, NEPA, CEQA" and Senator Feinsteins' New Bill**

**The California Desert District Mining Coalition (CDDMC) has been looking out for you and has responded to land closing situations that 99% of us no nothing about or if we did could not understand it or fathom that in the United States this could happen to our rights.**

CDDMC created a web-site a few years back just for information that the common man could go to see the players in the fight. Now it has turned from information gatherer to entity that wants to bring **Power to the People**. CDDMC feels that if all the players could focus their energies together as one entity as it was put to us, "CDDMC would be an unstoppable juggernaut." This is not just for southern California. It is for all of California and then the United States.

Some of you have heard about the land take over by the Desert Renewable Energy Conservation Plan (DRECP) and what they do not take will be taken over by the Area of Critical Environmental Concern (ACEC) and as of Dec. 11<sup>th</sup>, 2014 at Thursday nights BLM Steering Committee meeting Senator Feinsteins' put out a bill to take over the rest of the open space on public lands. Is this all real? YES. Attached is a letter, one of many to the DRECP and BLM showing on behalf of the public that there are many issues. CDDMC cannot fight this alone. DRECP, ACEC'S and Feinstein is all about making all public lands Conservation Land.

**PROPOSAL:**

There is so much more that we cannot put into this letter, but it is the Holiday Season and **we only have till January 8<sup>th</sup>, 2015 to get all of the letters and recommendations in**, so we are getting right to the point and need. Cc: all letters to [trilogyjoe@yahoo.com](mailto:trilogyjoe@yahoo.com) Subject Line ONE EFFORT.

**The first timeline that must be met by all.**

We have 2 volunteers to be appointed to the Desert Advisory Council (DAC) a federal 3-year appointed term determined by the Department of the Interior. The DAC committee basically hears the public and lets the Federal Government know what the public wants, having power over the public lands, rewriting language and analyzing how the law should be read and understood. The first one is **Bill Jensen to represent the miner and mining claims as #1 Non-Renewable Resources (Mining) or #2 Public At Large**. He will look out for our rights on multiple-use of the land and the 1872 Mining Law via the Congress. **The second one is Randy Coleman to represent us as Wildlife Resources** then we have a biologist and many other acronyms that fight the lies of the endangered species groups and the conservationists. He only looks at scientific facts. I stress if it is backed by scientific fact not opinions, as most of the environmental groups get legislation on, then he fights for us. We have **2 more volunteers for the DAC Committee that we would like to endorse. Scott Warner for Public At Large and Jerry Shodall for Public At Large**. These gentlemen have their bios attached and have backed Sleepy Bear Mining for the last 4 years and have become real friends to the miners, hunters, off-roaders and outdoor enthusiasts, going on public record and to most of the events and meetings.

**DIRECTIONS:** They must have letters from all the mining groups, one letter per group, manufacturer, club or organization. In this letter please put the number of people/clients represented, the California area represented, and that you back them for this position. There must be a letter for each person, Bill, Randy, Scott and Jerry. (See attached letter from CDDMC) Please write your own. You can use some of the same verbiage, but make it your own. CC all letters before you send them out to

[trilogyjoe@yahoo.com](mailto:trilogyjoe@yahoo.com) and in the subject line put ONE EFFORT. Do not use any verbiage like small scale, small miners, recreational, etc. You are miners and prospectors.

***In the Letter please put that we do not back Nathan Francis from Rio Tinto. There are many reasons why including that Rio Tinto just gave back private land to a conservatory and in the past some people that where on the DAC Committee only looked out for large companies not really helping any miner looking out for only the billion dollar companies. We do not need another one of them.***

We have a lot of plans on bringing everyone together fast to benefit from the Republican takeover. We want to run cable TV spots across California since they are very cheap on Saturday and Sundays for good time spots on educating Californians on the Public Land takeovers and what mining can do in an expedient way for the state and the power of the 1872 Mining Law. ½ hour spots range from \$90.00 to \$250.00 for spots on various local cable channels. To start for fund raising we are looking to have a revered non-profit to be the infrastructure to get this started instead of setting up CDDMC as the main link to bring in donations from the public to support efforts to fight. We are ready to put on an internet video with the song by Florida Georgia Line, “Dirt” sung by one of our own to start the donation efforts with an on-line campaign. Next we are ready, for donations, to send out bumper stickers that state, “If it isn’t grown it’s mined” <http://www.cddmc.com> , a book; National Legal Center for the Public Interest book, “The Mining Law of 1872: A Legal and Historical Analysis There are a lot of plans we just need to get started immediately.

The next timeline we must meet is February 1<sup>st</sup>, 2015 to respond to the DRECP. This is very important. You must also as groups and separate letters as individuals to your Congressman that you do not want the DRECP, ACEC Or Feinsteins bill to pass in California. This needs to get to your congressman by February 1<sup>st</sup>, 2015. Congressman and Senator links on <http://www.cddmc.com> .The CDDMC needs help on writing general comments and revised language for 130 sections of California for the DRECP via CDDMC. We need people that know how to write. There are over 900 pages to read to write these responses due by February 1<sup>st</sup>, 2015.

Please email Joe at [trilogyjoe@yahoo.com](mailto:trilogyjoe@yahoo.com) subject line: DRECP Help.

**Lets bring all the players protecting us together to make an unstoppable juggernaut.**
