Desert Advisory Council (DAC) Application  
Submission for Appointment to Represent Mining Non-Renewable Resources  
Or Public at Large

It is with a great interest that I request consideration for appointment to the Desert Advisory Council. Due to my lifelong love of camping, prospecting, fishing and study in the fields of geology, mining law and mining history, I am familiar with most of the covered areas. This interest was handed down to me by my father and grandfather, and further knowledge has been gained by my involvement with Public Lands for the People. It is my belief that my professional work history would be of a benefit to the Council, as my experience working in groups comprised of individuals from various companies, countries and government agencies will be similar to the dynamics of working on the DAC Council.

Professional Work History:

Industrial Journeyman Electrician

Company: Northrop Grumman Corporation

Responsible for constructing, maintaining and modifying plant electrical systems in support of company programs. Organized meetings with program managers and other affected parties to ensure work would not affect, alter or compromise ongoing program schedule.

Electrical Test Conductor

Company: Northrop Grumman Corporation

Responsible for electrical integration, test and launch of company and/or government assets. Strict adherence to program, company and governmental procedures and driving documents was required for this position.

Program Area Manager

Company: Northrop Grumman Corporation

Responsible for program and company adherence to CEQA, SCAMD and Title 21 requirements. Responsible for coordinating all facility work, property and asset movement, hosting VIP tours, and maintaining program security access.

Summary:

I feel that my history shows that I can be successful in an environment of regulatory documentation, overlapping laws and working with individuals from diverse walks of life and points of view. It would be an honor to be a part of this committee.

Sincerely,  
Jerry Shodall
